

## SERVA Collagenase NB 6 GMP Grade

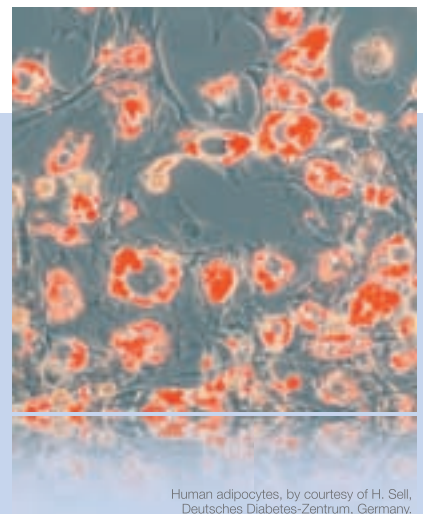

### High-end isolation and passaging of your stem cells!

Collagenase plays a pivotal role in isolation and passaging of stem cells. SERVA Collagenase NB 6 GMP Grade is a mild and effective enzyme to obtain viable cells in your lab. Additionally, because it is manufactured in compliance with cGMP requirements you get the best support to meet all regulatory requirements!

Collagenase NB 6 GMP Grade (*Cat. No. 17458*) contains Collagenase class I and class II as well as a balanced ratio of proteolytic activities. It is also available as technical grade (*Collagenase NB 4 Standard Grade, Cat. No. 17454*) for protocol establishment.

#### Collagenase NB 6 GMP Grade - Suitable for clinical applications

- Ready to use - Sterile acc. to Pharm. Eur.
- High safety - Testing of each lot for toxicity
- Comparable results - Reliable lot-to-lot consistency
- Customer specific CoA - Issued for every consignment
- Documents available - TSE safety certificate, viral safety and stability studies
