

Michigan has always been a
high-tech innovator.

As a new century gets underway, the state's public
and private leading-edge companies and institutions
are driving to revolutionize medicine fueled by
investment of more than **\$2 billion**
in research and development each year.

“MADE IN MICHIGAN” WILL CHANGE THE WORLD AGAIN

The Michigan Economic Development Corporation is a proud organizer of the
2010 World Stem Cell Summit. Let Michigan and the MEDC give your research the Upper Hand.
